Locos 40 votes, leaving Dorchester and Worcester to of new religious ideas. hear from. Sanate.-The Senate comprises 15 Whigs and 6

Locos. No new Senators were elected this year.

#### Twaddlers.

Had the writer been personally acquainted with certain members of the Old Democratic Junto at Indianapolis, for instance, he could not have given a more from the gentleman alluded to above. faith al portrait of them.

The greatest patriot now-a-days, (in his own estimation.) is the conservative twaddler and dodger. With him nothing is right that has not been reached by a round-about process, and which puts him in office or influence. Directness of pursuit, is with him as unnatu- their pockets to repletion-finds employment not only ral as honesty of purpose. When the barracks are in the constant extension of Ruil Road lines from your cause; when the cause is threatened, none so but in addition to these, improves rapidly old manucessful, he is at your elbow at the first breaking of Bunker Hill Aurora; trusts that the strong men, the "old dictators" of the townships of Andover and Methuen, Essex county, hands more than twelve hours and a half, they had to endure the proscription of being denied an office! above this fall an immense dam is now in progress of them an opportunity of enjoying longer recreation perhaps to desert at the first reverse. He wants the dam 900 feet in length. The dimensions of the a victory won by such fellows, is the worst thing that small magnitude and importance.

the time serving at the expense of the true and tried power to the factories, will commence. This is to best cause, by shaming its best advocates; and loses feet from it. is soon distrusted by the honest soldier.

But it is said, other nations tax States authority over Oregon. Let us take a glance our commodities, and we must tax theirs in return, at the whale traders that landed at the Sandwich Is-Is this an honest argument, or only a pretext ! If the former, then in proportion as other nations relax their restrictive system, we shall do the same. If the latter, we shall secretly deprecate any such change, and perhaps openly denounce it, as in the case of the British Anti-Corn Law League. The grand object of that Association is the promotion of free trade; more especially free trade in breadstuffs; and first of all, in England herself. The value of breadstuffs imported into Great Britain and Ireland, has amounted, on an average of the last twelve years, to \$17,-000,000 per annum; and would have been still greater not include a large trade in American vessels from but for the heavy duties. No nation, perhaps, is so the North-west coast to China, and thence home.

> there is no mode of raising it so little burdensome to been flooded with petitions, from those interested, to the people, because so little perceived by them, as by institute some sort of authority and laws on the Oreraising it, except the three or four millions realized of necessity. This has been totally unheeded. It is annually from the sales of public lands; we know of true a bill was presented to extend the lowa jurisdicnone better. Still, it is a mode which bears very tion over the Oregon, and also to erect the new terrihard upon men of small means, because it compels tory of the Nebraska and extend its authority over them to pay almost as much per head, as the same the Oregon, but was not discussed last session. Thus number of rich men; whereas the latter ought to pay an immense marine and trade have been entirely in proportion to their property. Among late American inventions, we notice one for filing saws, which will prove a very great time Some person who had nothing else to do has The following lines are found upon a board over a saving machine. The machine has two files, each ascertained that there are 550,000 grains in a bushel ing it over the saw; and they are connected with le- | 37,000 in herse-beaus. vers, so arranged as to lift the files from the saw on action.

The following Ode, by the lamented Thomas Hood, The most perfect exemplification of actual free trade It is most marvelous that certain prints among us, reminds us of the freshness and beauty which per-

Autumn.

I saw old Autumn in the misty morn Stand shadowless like Silence, listening To silence, for no lonely bird would sing Into his hollow ear from woods forlorn, Nor lowly hedge nor solitary thorn ;-Shaking his languid locks all dewy bright With tangled gossamer that fell by night, Pearling his coronet of golden corn.

Where are the songs of Summer ?- With the sun, Op'ning the dusky eyelids of the South, Till shade and silence waken up as one, And Morning sings with a warm odorous mouth. Where are the merry birds !-away, away, On panting wings through the inclement skies, Lest owls should prey

Undazzled at noon day, And tear with horney beak their lustrous eyes.

Where are the blooms of Summer ?- In the West, Plushing their last to the last sunny hours, When the mild eve by sudden Night is prest, Like tearful Proserpine, snatched from her flowers To a most gloomy breast. Where is the pride of Summer-the green prime-The many, many leaves all twinkling ?- Three On the mossed elm: three on the naked lime Trembling-and one upon the old oak tree ! Where is the Dryad's immortality ?-Gone into mournful cypress and dark yew, Or wearing the long gloomy winter through In the smooth holly's green eternity.

The squirrel gloats on his accomplished hoard, The ants have brimmed their garners with ripe grain, And honey-bees have stored The sweets of Summer in their luscious cells; The swallows all have winged across the main; But here the Autumn melancholy dwells, And sighs her tearful spells, Among the sunless shadows of the plain.

Upon a mossy stone, She sits and reckons up the dead and gone With the last leaves of a love rosary, Whilst all the withered world looks drearily, Like a dim picture of the drowned past In the hushed mind's mysterious far away, Doubtful what ghostly thing will steal the last Into that distance, grey upon the grey.

O go and sit with her, and be o'ershaded Under the languid downfall of her bair; She wears a coronal of flowers faded Upon her forehead and a face of care ;-There is enough of withered every where To make her bower-and enough of gloom ; There is enough of sadness to invite, If only for the rose that died-whose doom Is Beauty's-she that with the living bloom Of conscious cheeks most beautifies the light;-There is enough of sorrowing, and quite Enough of bitter fruits the earth doth bear-Enough of chilly droppings for her bowl; Enough of fear and shadowy despair, To frame her cloudy prison for the soul!

> The Season. Summer's gone and over ! Fogs are falling down;

And with russet tinges, Autumn's doing brown. Boughs are daily rifled By the gusty thieves. And the Book of Nature Getteth short of leaves. Round the tops of houses, Swallows as they flit, Give like yearly tenants, Notices to quit. Skies, or fickle temper, Weep by turns and laugh-Night and Day together, Taking half and half. So September endeth-

Cold and most perverse-

But the months that follow,

Sure will pinch us worse

Of Some very interesting experiments were performed recently at Westminster, England, with an electrical gun which was noticed as having been invented some months since; but we have neglected a notice of it for some weeks, hoping to get some further intelligence. The gun, a barrel for discharging bullets or balls #ths of an inch in diameter, is placed over the body of a machine, by which the propelling power is generated, and the whole moves upon a carriage with a pair of wheels, weighing altogether half a ton, and is calculated to be drawn by one horse at facturers, should the doctrines of the most ultra free the English to remain upon the Columbia is to surther rate of 8 or 10 miles an hour. When in position, a third wheel is attached, by which it traverses with ease and steadiness. The engineer is able to take a true aim, the barrel having a sight similar to that of a rifle. The barrel is supplied with balls by two chanufacture, in this country, goods which can be made the "way to preserve peace." There are two classes be made large enough to contain an immense number of balls. It is calculated that 1000 balls or more can be discharged a minute, the volleys being shot off in almost continuous succession, the stationary chamber supplying the barrel. This experiment, it appears, ully carried out all the inventor proposed when the invention was noticed in April last. The bullets were driven through a thick plank, and afterwards flattened completely on an iron target. Those directed against the target, without the intervention of the plank, were beaten to atoms and literally plastered mon boards placed by the side of the target. The force far exceeded that of any other military engine of equal calibre in which gunpowder is employed. A cents in Manchester could only be laid down here 104 Indiana State Sentines. - We regret to see that board 3 inches thick, at 20 yards distance, was comsome professed friends of General Cass are about to pletely shattered through by the bullets, as if done by get up a new paper for the purpose of promoting his a centre-bit and drill; and the rapidity and precision 3 26 election, and breaking down the Indiana State Sentinel. of aim were extraordinary.
